ELECTRIC

May 6, 2015

Dear Commission Members,

This letter concerns the proposal to change the "net metering" system that went into effect in 2009 and has done so much to encourage home owners to install rooftop solar. Please do not support this change. The more solar power citizens use, the less carbon dioxide is released and less water is used in producing electricity. This means greater health and long term sustainability for us and our children. Please do not sacrifice the honorable approach for short term greed. We don't buy the argument that non-solar customers that don't get solar credits (such as ourselves) are thus stuck with large unfair costs. We benefit from greater solar use in our community.

We ask that you please continue to support the use of solar power, which also helps small businesses in our state, and reject the proposal for change from Tucson Electric Power, a company we otherwise respect.

Thank you very much. Sincerely,
Thomas and Jane Skinner
